IMAGINE! PRINT SOLUTIONS ACQUIRES SECOND YOUNG SHIN GIANT DIECUTTER FOR CLASSIC GRAPHICS OPERATIONS

Schaumburg, IL (September 4, 2018) - Phillip Mack, National Sales Manager of Young Shin USA Limited, a wholly-owned subsidiary of South Korean-based Young Shin Industries, is pleased to announce that Minneapolis, Minnesota-based Imagine! Print Solutions ("Imagine!") has acquired a second Young Shin Giant diecutter with EZ Feeder for its Classic Graphics operations in Charlotte, North Carolina. Imagine! has enjoyed numerous advantages with the Young Shin Giant series of diecutters since its initial acquisition of a Giant 250SII flatbed diecutter with EZ Feeder for its Minneapolis, Minnesota headquarters in 2016.

Classic Graphics joined Imagine! Print Solutions in late 2013 and is recognized for its commitment to the client perspective, advanced technological capabilities and cutting-edge graphics expertise on behalf of top national and international brands. The Young Shin Giant diecutters were selected by Imagine! for both locations due to their large format capability, quick make-readies and high-speed production yields.

Installed at Classic Graphics, the new Giant 210 Diecutter can accommodate E, B, A, AB Flute corrugated board from 0.05" to approximately 0.43" at speeds of up to 3,000 sheets per hour. The Giant's precise center line technology provides easy and rapid set-up of the die board using the unit's center block. Thin sheets feed smoothly and effortlessly with the Giant's enhanced feeding and conveying systems. The innovative air floating device allows easy withdrawal of the cutting plate for optimum operator efficiency. The Giant 210 offers a wide range of sizes from 43.30" x 33.46" to 82.67" x 60.50" to suit the needs of a wide variety of production requirements.

The EZ Feeder adds further productivity enhancements since substrates can be easily stacked and automatically fed into the diecutter. The Giant's EZ Feeder frees one or two operators (if large sheets are being used) to manage the job and advance the make-ready for the next job rather than manually feed the substrates into the diecutter.

The Young Shin Giant 210 diecutter is designed and manufactured in South Korea with specific emphasis on large format diecutting, automation and low cost of ownership. Mark Popp, Vice President of Manufacturing for Imagine! Print Solutions remarks, "Since the installation of the Giant diecutter at our Minneapolis headquarters, we have appreciated the reliability and low cost of ownership of the unit while enjoying the benefits of well-trained service technicians and U.S.-based supplies and parts. The investment we made in the second Young Shin Giant for Classic Graphics will further our commitment to offer rapid turnaround of assignments with the highest quality output available for our clients."

Young Shin's North American sales and service office is led by Mack, who added, "We are delighted to have the Giant diecutter installed at Classic Graphics as their business continues to expand as part of Imagine! Print Solutions. This acquisition represents the second Giant diecutter installed within the Imagine! organization. The dependable and versatile operation of the unit together with its large format capabilities will support the future growth and production requirements of this premier full-service visual production firm."
