COMPLETE DESIGN & PACKAGING SELECTS YOUNG SHIN ZENITH 210 PLUS DIE CUTTER FOR HQ OPERATIONS

Schaumburg, IL (August 12, 2020) - Phillip Mack, Vice President of Young Shin USA Limited, a wholly-owned subsidiary of South Korean-based Young Shin Industries, is pleased to announce that Complete Design & Packaging (CDP) will add a new Young Shin Zenith 210 Plus Die Cutter to support its growing production requirements at its Concord, North Carolina headquarters facility.

The Young Shin high-speed flatbed Zenith 210 Plus was selected by the firm following an extensive market evaluation of fully-featured die cutters. The Zenith 210 Plus offers large format capability of 82.5" x 59.05", rapid make-ready time, unparalleled performance, exceptional quality, and industry-recognized reliability. The Young Shin die cutter is scheduled to be installed and placed into production in early Fall 2020. The Zenith 210 Plus accommodates single- and double-wall board corrugated; solid substrates such as micro flute; litho label and single-face laminated board; foam core; plastic corrugated and paperboard down to .060 point; a maximum sheet thickness of .433"; and can run up to 5,000 sheets per hour.

Designed and manufactured in South Korea, the Zenith incorporates specific performance attributes that include automated set-up, die compatibility with existing Swiss-made equipment and an extremely low cost of ownership. Howard Bertram, President of CDP, remarks, "In keeping with our commitment to provide the highest quality production for our clients, we chose the Young Shin Zenith 210 Plus to die cut the output from our in-house EFI™ Nozomi C18000 and EFI™ VUTEk® h5, among many other standard output and digital production devices. The Young Shin will allow us to maximize and streamline the diecutting process to further enhance our firm's superior quality and turnaround time for our clients particularly expediting volume digital print projects. Leading through the implementation of innovative solutions has always set our organization apart from others in this ever-changing industry."

Young Shin's North American sales and service operations are led by industry-veteran, Mack, who remarked, "We are delighted that the Zenith 210 Plus will contribute toward CDP's continued expansion and growth within the industry. The features of the Zenith 210 Plus die cutter will further CDP's superior performance objectives, increase employee and job productivity, and expand the depth and range of capabilities offered by this firm, one of the most widely recognized and reputable leaders in the market."

Mark Caffary, Regional Manager for Young Shin USA who led the sales effort, added, "We welcome CDP to Young Shin's growing roster of prestigious firms that have selected our premier die cutters to further both productivity and profitability. We are confident that this acquisition will further CDP's corporate goals while maintaining its dedication to provide unsurpassed quality and turnaround time to its highly-regarded client base."

About Complete Design & Packaging

Privately owned and operated for 18 years, Complete Design & Packaging (CDP) has grown from a small brown box manufacturer into a state-of-the-art sheet feeder plant specializing in high graphic packaging and Point-Of-Purchase displays. Headquartered in Concord, North Carolina, CDP's modern facilities are fully equipped to handle any packaging challenge. The firm's 120,000 square foot manufacturing site and 92,000 square foot warehouse are home to millions of dollars of technology and machinery investments—including, but not limited to, the first EFI™ Nozomi C18000 in the United States, an EFI™ VUTEK® h5, an Esko Kongsberg C64 CAD table, multiple flexo folder-glueers and most recently, the Young Shin Zenith 210 Plus.
